DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered second claim 18 has been renumbered 19 and therefore, original claims 18-33 have been renumbered 18-34.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 33 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Process claims 33 and 34 are indefinite since they fail to further limit the prior system claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 13-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Takaki ('458).

Per independent claim 13, Takaki discloses an acoustic system that includes an emitter base (Fig. 1) comprising means (26) of emission of sonar pulses, a receiver base (Fig. 2) comprising means (28-46) of reception and of processing of sonar echoes, the emitter base also comprising means (14, 16, 18, 21) for transmitting mode information to the receiver base wherein the mode information is transmitted to the receiver base in acoustic form by an appraisal pulse (synchronization pulse), the

appraisal pulse being modulated by a signal containing the mode information. Claim 13 is thus, anticipated by Takaki.

Dependent claims 14-32 are further provided by Figs. 1-2 of Takaki.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
